MongoDB is a free and open-source cross-platform document-oriented database program. Classified as a NoSQL database program, MongoDB uses JSON-like documents with schemas. MongoDB is developed by MongoDB Inc. and is free and open-source, published under a combination of the GNU Affero General Public License and the Apache License. MongoDB support several operating system such as Windows, Mac , Linux and FreeBSD. Main features of MongoDB are ad hoc queries, indexing, replication ,load balancing, File Storage, Aggregation, server-side JavaScript Execution and Capped collections.
